Introduction

REDDOT Equipment is a well-known global manufacturer that has been a leader in China's material handling industry since 1993. While the company is very diversified the core focus areas include electric lift trucks, warehouse solutions and OEM parts. The company's headquarters is in Hangzhou, China and it owns over two million square feet of manufacturing space across facilities in Anji, China, Jiangjiang, China and Wisconsin, USA. In addition, the company has distribution facilities across China and in Illinois, South Carolina, Japan and Belgium. REDDOT owns many patents in both the USA and China and owns trademarks across the globe. Business units include REDDOT, East power, Manhand, REDDOT parts and Big Joe. Globally, REDDOT has experienced tremendous growth and now has nearly 1,000 employees in locations around the globe. Total revenues in 2013 were \$200 million (US\$) and growth is projected at 20% annually.

The idea of development

"Work hard to take the right path", REDDOT is determined to be the material handling industry's innovation leader and believes our path should be focused on innovation in harmony with our core beliefs of being a good global citizen including consuming less, emitting less, building to provide products that improve humanity and relentlessly fighting for quality. REDDOT takes seriously its moral and social commitment to the overall global environment.

"Consistent improvement and development". Guided by this mandate, REDDOT will continue to improve every facet of our business and consistently develop our people in the pursuit of excellence. We recognize that we can only grow if we are driving innovation and constantly exceeding our customers' expectations.

"Excellent Service, always", Extraordinary customer service is the foundation for our growth. Always exceeding our customers' expectations are fundamental to our success and our being. This includes exemplary local support in all markets where we do business.

REDDOT believes in customer driven design and has developed hundreds of models to meet specific customer and industry applications. Thanks to a great team, cutting edge product design and industry leading manufacturing processes REDDOT achieved top Class I/II/III market share in 2013 (in units) in China and will produce over 20,000 units in 2014.

Innovation is the key driver of REDDOT's success. REDDOT has a global engineering team of nearly 100 people and believes in a relentless focus on customer driven design.

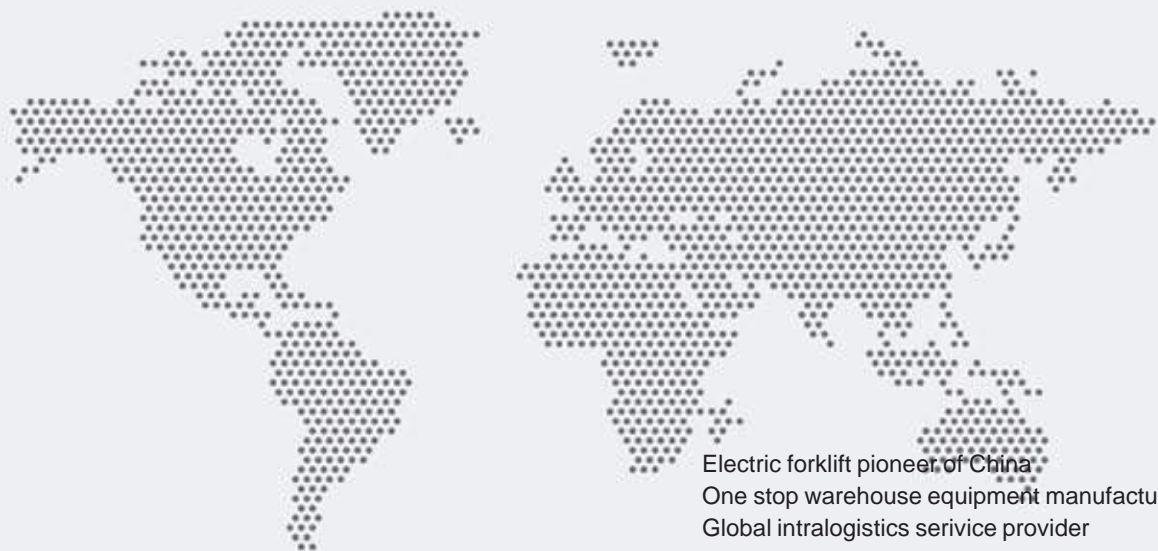

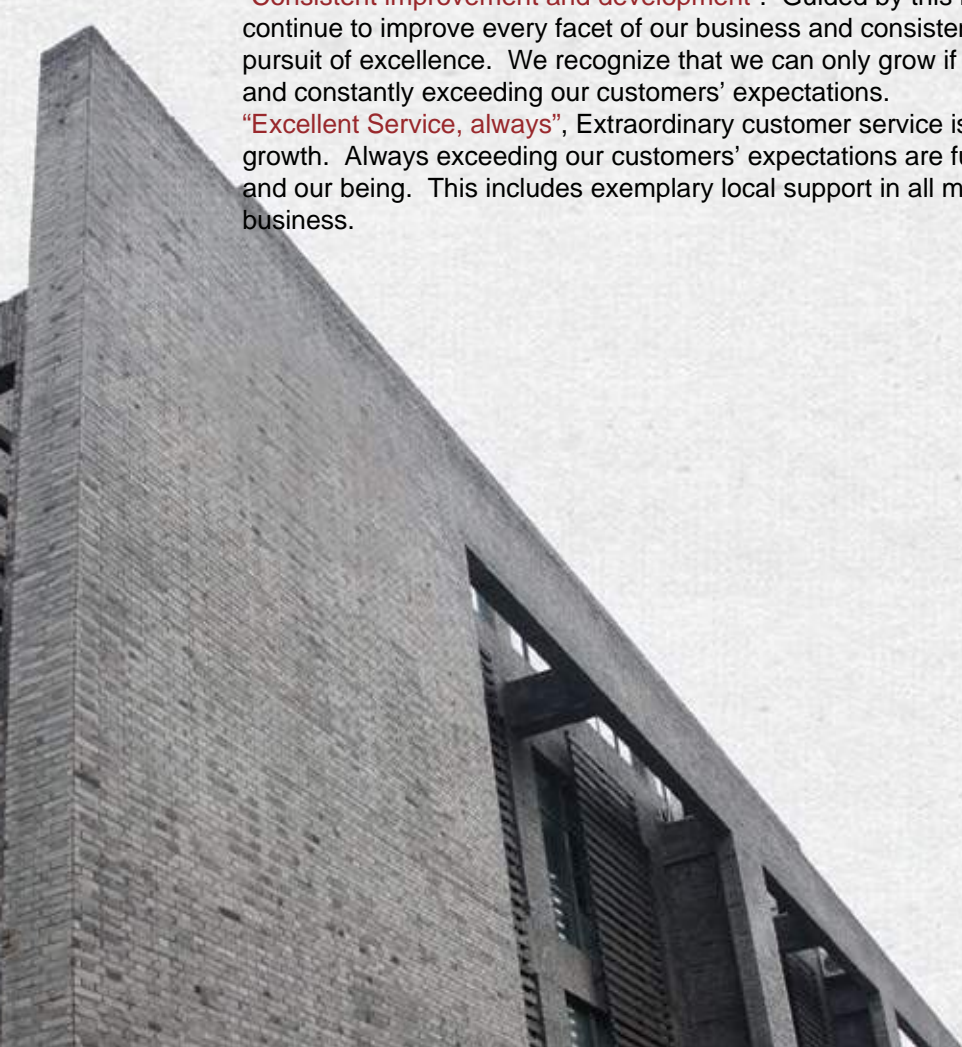

A closely aligned international management team shares forecast and uses high quality comm.on components to improve sourcing and quality. ISO standard is well adopted in every detail step through entire process.

REDDOT has made a tremendous investment in IT and automation equipment to ensure high levels of quality and productivity. REDDOT uses a production Floor Kanban system and a comprehensive ERP system to ensure quality and build into every process. REDDOT tests every single product and maintains production records to deliver outstanding product quality and after market support.

REDDOT has local aftermarket support in every major Industrial area within China as well as a global network of dealers with 500 locations around the world.

REDDOT has a comprehensive web portal containing technical documentation on all models distributed globally as well as a user friendly on-line parts ordering system.
